

# Kishan G

Bengaluru, KA | +91 6364233498 | kishikg11@gmail.com | LinkedIn | GitHub

## Career Objective

Information Science undergraduate at NMIT Bangalore with a strong foundation in Python, cloud platforms, and end-to-end ML workflows. Passionate about developing real-world, social-impact solutions. Seeking to leverage hands-on experience in cloud data pipelines, computer vision, and predictive modeling to contribute to enterprise AI engineering and data infrastructure projects.

## Education

**Nitte Meenakshi Institute of Technology (NMIT)**

*B.E. in Computer Science & Engineering - CGPA: 7.67*

Bengaluru, KA

*Sept 2023 – Aug 2027*

**Presidency Pre-University College**

*Science (PCMB) - Percentage: 90%*

Sira, KA

*June 2021 – March 2023*

## Technical Skills

**Programming & Query Languages:** Python, C, C++, C#

**AI/ML & Data Science:** NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn, OpenCV, YOLOv8, TensorFlow Lite

**Web & APIs:** REST API integration, JavaScript, Angular (coursework)

**Cloud & Data Infrastructure:** Google Cloud Platform (Pub/Sub, Dataflow, Apache Beam, BigQuery, ETL Pipelines)

**Databases & Visualization:** MySQL, PostgreSQL, Looker Studio, Python visualization libraries.

## Projects

**StreamSight AI** | *Real-Time Data Pipeline & Anomaly Detection Platform*

2026

 [GitHub](#)

- **Technologies:** Google Cloud Pub/Sub, Dataflow, BigQuery, Python, Looker Studio, Scikit-learn.
- Architected a cloud-native streaming data pipeline using Pub/Sub and Dataflow, processing events at 1/sec sustained throughput with 10-second window aggregation and 5-second early-trigger updates, deployed on autoscaling infrastructure.
- Designed end-to-end ETL workflows in Apache Beam/Dataflow processing 938+ windowed event records, persisting structured aggregates into BigQuery with an optimized 4-column analytical schema.
- Built a two-method anomaly detection layer combining Isolation Forest and statistical z-score thresholding, flagging 51 anomalies via z-score and 14 via Isolation Forest with 100% cross-method overlap.
- Delivered a live Looker Studio dashboard connected directly to BigQuery, surfacing event volume trends, category breakdowns, and flagged anomalies for near-real-time monitoring.

**CrowdIQ** | *Real-Time Crowd Detection & Analytics System*

2025

 [GitHub](#)

- **Technologies:** Python, YOLOv8, DeepSORT, OpenCV, SQLite, Streamlit.
- Built CrowdIQ, a real-time multi-object detection and tracking analytics system using YOLOv8 and DeepSORT, achieving ~21 FPS detection on CPU-only hardware (no GPU/CUDA).
- Implemented zone-based crowd analytics (footfall counting, dwell-time measurement, density heatmaps) using point-in-polygon logic, processing 8,700+ tracked events into a normalized SQLite schema.
- Profiled the detection-tracking pipeline, identified DeepSORT's re-identification embedding as the primary bottleneck, and applied frame-skipping optimization to achieve a 2.1x FPS improvement (2.95 → 6.24 FPS).
- Developed a live Streamlit dashboard visualizing real-time metrics, crowd heatmaps, and activity trends, with full pipeline deployed and version-controlled on GitHub.

**Smart College Companion** | *Flutter-Based Academic Productivity Application*

2025

 [GitHub](#)

- **Technologies:** Flutter, Dart, Groq AI API (LLaMA 3.3 70B), SharedPreferences, Hive DB, Android SDK.
- Architected a cross-platform Android application using Flutter with a modular, screen-based architecture supporting 8 fully integrated academic management modules.
- Integrated Groq AI API (llama-3.3-70b-versatile) to power an in-app academic chatbot delivering instant doubt resolution.
- Developed a unified student productivity platform covering attendance tracking, timetable scheduling, assignment management, internal marks prediction, notes organization, exam countdown, and CGPA calculation with semester-wise GPA computation.

## Certifications

**Google Cloud Computing Foundations Certificate** — Google Cloud

**Oracle Cloud Infrastructure Foundations Certificate** — Oracle

**Data Scientist Certification** — Simplilearn

**AWS AI Practitioner Challenge** — Udacity
